A front-end software engineer with over a year of experience at a startup in the AI industry, currently studying for a master's in IT at UTS. Committed to providing high-quality results with robust and user-friendly web applications based on scalable and maintainable codebases.

WORK EXPERIENCE

Front-end Software Engineer

Jun 2021 - Nov 2022, Coxwave, Inc.

- Planned, architected and implemented the User App Demo feature, relevant UI components and the admin page in Manta (deprecated), an AI API platform.
- Developed Enterpix, a web platform for AI art curation and image generation.
- Developed Hama, an AI-powered web application for erasing objects from images.
- Developed two versions of the corporate website.
- Designed and built five AI-based web application demos for the AI seminar held at LG Electronics.
- Took charge of building the design system using Figma with UI/UX designers.

Account Executive

Apr 2019 - Apr 2020, Macbee Planet, Inc.

- Served as the primary point of contact for clients.
- Regularly reviewed ad analytics to make adjustments as needed.
- Collaborated with a range of online media to accomplish client KPIs.
- Created and delivered tailored presentations to prospective clients.
